

# Company Profile

# WHO WE ARE?

In today's fast-changing world, Provision is your ideal partner in digital transformation. We are a leading company in providing innovative technological solutions aimed at supporting businesses across various sectors to achieve excellence and sustainable growth.

Our comprehensive services include custom software development, mobile application development, website design and development, and IT consulting, ensuring you advanced solutions aligned with your organization's vision and goals. Our experienced team combines deep technological knowledge with global best practices to deliver tangible results that elevate your business toward success.

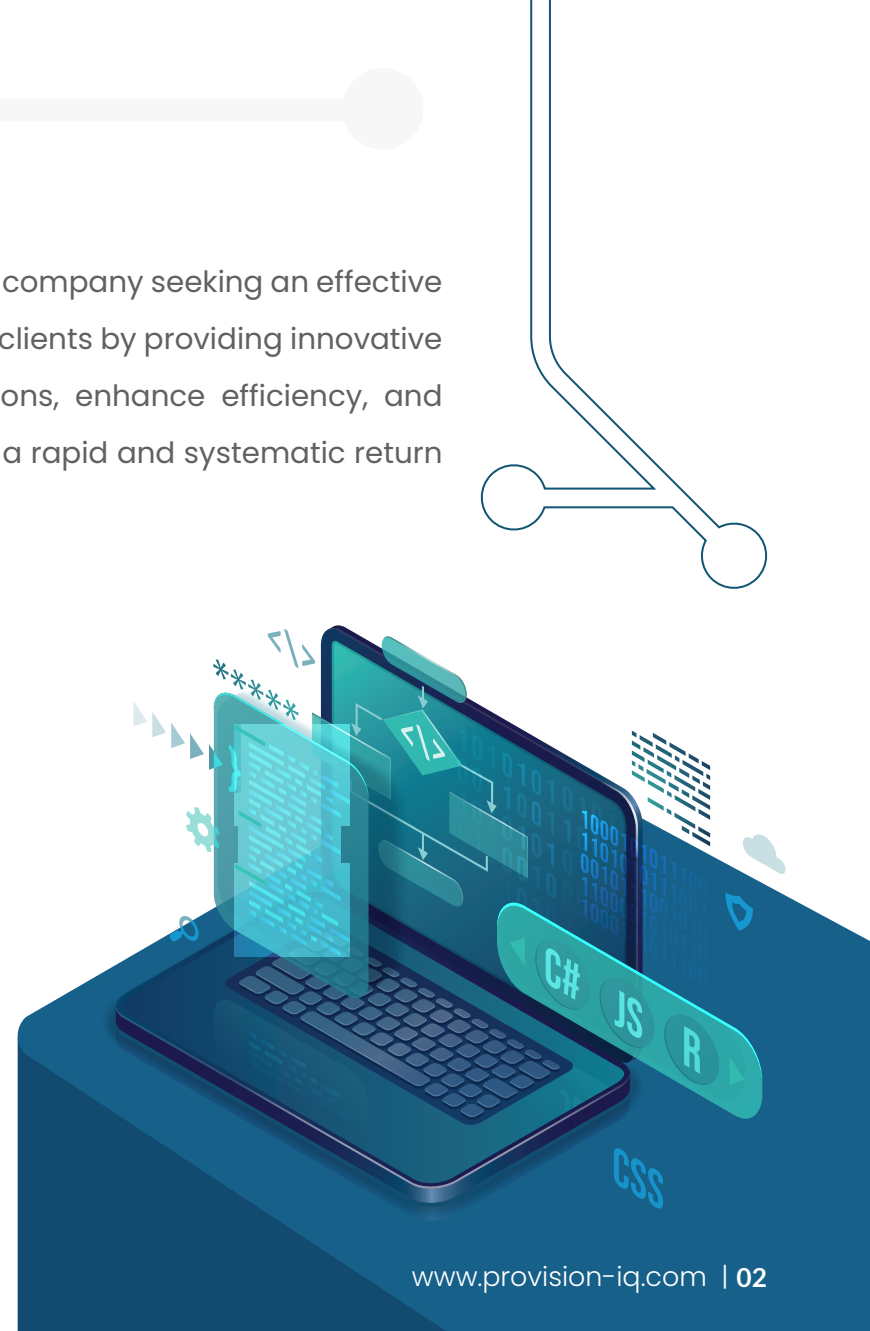

# Our Vision

At Provision, we aspire to become the primary partner for every company seeking an effective and integrated digital transformation. We aim to empower our clients by providing innovative and sustainable technical solutions that meet their aspirations, enhance efficiency, and achieve leadership in an increasingly competitive market with a rapid and systematic return on investment.

# Our Mission

At Provision, we are committed to providing comprehensive and flexible technical solutions that help our clients confidently and flexibly address business challenges. We focus on building long-term partnerships with our clients by offering tailored services that enhance operational efficiency and enrich the end-user experience, allowing you to focus on achieving your strategic goals with guaranteed ongoing support.

# Our Values

## 01 Continuous Innovation:

We constantly strive to develop creative technological solutions that meet your needs and support your market advancement. Innovation is not just an option for us; it's a commitment reflected in every project.

## 02 Commitment to Quality:

We believe success is achieved through exceptional quality, so we are dedicated to delivering the highest standards at every stage of project execution, ensuring reliable and sustainable solutions for you.

## 03 Partnership and Collaboration:

We build long-term partnerships with our clients, working together as a team to realize your vision and achieve the highest performance levels.

## 04 Flexibility and Adaptability:

Recognizing the importance of adaptability in a rapidly changing work environment, we offer flexible solutions that align with your evolving business needs and help you stay ahead.

## 05 Customer Focus:

Our clients are at the center of our attention. We make an effort to understand their requirements and deliver solutions that exceed their expectations, creating added value that meets their ambitions.

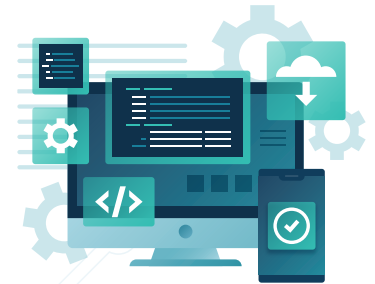

# Our Services

## Custom Software Development:

At Professional View, we believe that software is not just a tool, but a strategic transformational factor that drives companies to success. We design and develop customized software solutions that align with your goals and business needs, from business requirements analysis through system design to implementation and support. With our team of professional engineers, we deliver highly efficient and easy-to-use solutions, helping you achieve greater productivity and deliver greater value to your customers.

## Mobile Application Development:

At Professional View, we develop mobile applications that offer a seamless and integrated user experience, enhancing customer engagement with your brand. Our services include developing high-performance applications compatible with various operating systems and offering flexible, easy-to-use user interfaces. We guarantee innovative applications that enhance customer experience and increase loyalty, while providing technical solutions that meet international quality standards.

# Our Services

## Website Design and Development:

At Professional View, we offer integrated solutions including website design and development, enhancing your digital presence and leaving a strong impression on your customers. Our work includes designing attractive interfaces and developing interactive, easy-to-navigate websites, ensuring they are compatible with all devices and operating systems. Whether you're seeking to attract new customers or enhance engagement with existing ones, our websites combine powerful performance with distinctive design to deliver an optimal user experience that supports your goals and meets your aspirations.

## Software Consulting:

We understand that technology decisions significantly impact business success and sustainability, which is why we offer software consulting services to help you make the right decisions when dealing with technology. Our software consulting work includes analyzing operations, understanding the challenges facing your company, and providing innovative technical proposals and solutions that align with your strategic goals. Whether you're looking to adopt a new system or improve an existing one, we're here to help you take informed steps that will lead you to success.

## ERP and CRM Integration:

We understand that enterprise systems such as ERP and CRM may not cover all your needs, so we offer specialized solutions with applications that integrate with your existing systems, ensuring smooth data flow, improving efficiency, and providing customized functionality without the need to change your core systems.

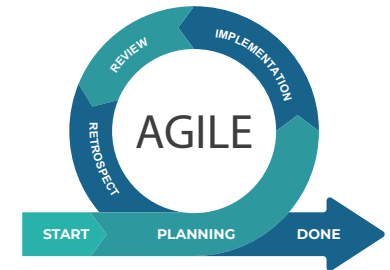

# Workflow and MVP Approach

At Provision, we combine the Agile methodology and Minimum Viable Product (MVP) approach to ensure flexible and efficient project delivery.

## 01 Workflow – Agile Methodology:

We adopt the Agile methodology for project management, ensuring flexibility and quick adaptability to changes. Agile methodology involves dividing work into short sprints, reviewed with the client before moving to the next phase. This ensures high-quality, cost-effective, and timely delivery.

## 02 Minimum Viable Product (MVP):

We often recommend starting with a Minimum Viable Product (MVP) to test project ideas and gather user feedback. MVPs include essential features, allowing efficient resource use and opportunity for product refinement based on actual user insights.

## 03 Kanban Methodology:

We use the Kanban method to keep tasks organized and easy to follow. It helps us focus on the most important work, avoid taking on too much at once, and finish tasks quickly. By keeping things simple and clear, Kanban ensures smooth progress and allows us to adjust to any changes easily.

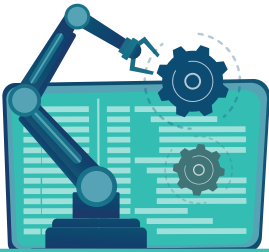

# Project Examples We Can Develop

## Small Business Management System:

A platform designed to help small business owners organize tasks, allocate resources, and track progress effectively. Features include an easy-to-use interface, reporting tools, and task management capabilities to streamline decision-making.

## Enterprise Process Automation System:

A tailored system for large organizations to manage day-to-day operations, such as HR, finance, and supply chain management. It enhances operational efficiency by automating repetitive processes and providing centralized control.

## Integrated Point of Sale (POS) System:

A robust POS system for retail stores to record sales, manage inventory, and analyze customer data. It provides features such as sales tracking, inventory alerts, and detailed analytics to enhance the shopping experience.

# Project Examples We Can Develop

## E-Learning Platform:

A platform designed to help small business owners organize tasks, allocate resources, and track progress effectively. Features include an easy-to-use interface, reporting tools, and task management capabilities to streamline decision-making.

## E-Commerce Platform:

A real-time tracking platform for logistics companies to monitor shipments, provide status updates, and send notifications. It ensures efficient delivery and enhances transparency for both clients and service providers.

## Shipment Tracking System:

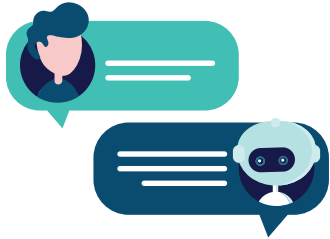

A real-time tracking platform for logistics companies to monitor shipments, provide status updates, and send notifications. It ensures efficient delivery and enhances transparency for both clients and service providers.

# Project Examples We Can Develop

## Patient Appointment Management App:

A healthcare application that allows patients to book appointments, view medical records, and communicate with doctors seamlessly. It enhances patient convenience and improves clinic efficiency.

## AI Systems and Chatbots:

AI-powered solutions streamline operations and customer engagement by analyzing data, predicting trends, optimizing efficiency, and providing instant support through virtual assistants, enhancing business processes and responsiveness.

## Hotel Booking Management System:

A user-friendly platform for hotel clients to book rooms online. Features include room availability management, booking notifications, and preference tracking to enhance customer satisfaction.

# Project Examples We Can Develop

## Customer Loyalty Program for Automotive Sector:

A user-friendly platform for hotel clients to book rooms online. Features include room availability management, booking notifications, and preference tracking to enhance customer satisfaction.

## Electronic Archiving System:

A solution to convert paper documents into digital formats with secure search functionality. It ensures data accessibility while maintaining confidentiality and organization.

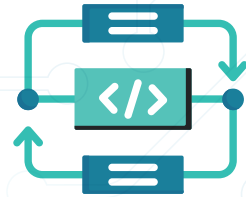

## Legal Case Management System:

A specialized system for law firms to manage legal cases, organize client information, and analyze legal documents with precision. It streamlines workflows and improves overall productivity.

# Technologies and Tools We Use

## 01 Frameworks and Programming Languages:

We use advanced technologies to develop robust and secure websites, ensuring high performance and security. Additionally, we create mobile applications that work across different operating systems using a single codebase, saving time and cost. We focus on designing interactive and user-friendly interfaces with technologies for fast and accurate data handling to improve user experience.

## 02 Databases:

Provision employs database systems that enable efficient and fast data storage and organization. We also use flexible tools to handle unstructured data, allowing easy and accurate management of diverse data types.

## 03 Cloud Technologies:

We utilize advanced cloud platforms that provide centralized application management and real-time data updates, such as notifications or account synchronization. Our cloud solutions are secure, reliable, and scalable.

# Technologies and Tools We Use

## 04 System Integration

We simplify data transfer processes between different systems using secure and fast technologies. Real-time updates enhance user interactions with applications or websites.

## 05 Development and Deployment Tools

Our tools ensure smooth application operation across various environments and devices. We automate programming processes, speeding up application building and deployment for efficiency.

## 06 Code Management and Monitoring

Provision uses modern tools to manage programming workflows effectively, enabling seamless collaboration among team members. We continuously monitor application performance, detecting errors in real time to ensure quality and stability.
